SPACES THAT WORK HARDER.

Thoughtful interiors that bring together design, functionality and personality.

Meet Our DESIGN TEAM

Rochelle is a former style editor for the FT's How to Spend It magazine and Katy is a qualified lawyer, turned legal recruiter. We both have a passion for creating soulful, layered and inviting interiors.

Our complementary skills — Rochelle's styling experience and Katy's professional and pragmatic approach — along with our shared love of creative sourcing and design, led us to set up Hettie Jacks in 2017. What began as a part-time project has grown into a fully-fledged business, working on both residential and commercial projects across the UK.

Our approach is relaxed, layered and design-led, bringing warmth and personality to commercial interiors. We combine natural materials, considered colour and lighting, artwork, textiles and unexpected details to create workplaces that feel less corporate and more human.

We design with the finished space in mind from the outset.

FURNITURE

We specify and source furniture as an integral part of the design — considering scale, layout, materials and budget rather than selecting pieces in isolation.
